## SUMMARY

MERN Stack Developer & AI Enthusiast with hands-on experience building full-stack applications using React, Node.js, Express, and MongoDB. Experienced in Authentication & Authorization, RESTful APIs, role-based access control, and AI-powered features. Seeking an entry-level Software Developer role to contribute to scalable web applications.

## SKILLS

- **Languages:** JavaScript (ES6+), Python, C++
- **Frontend:** React.js (Hooks, Context API), Axios, HTML5, CSS3, Bootstrap, Tailwind CSS
- **Backend:** Node.js, Express.js, RESTful API, Authentication & Authorization (JWT), Middleware, Error Handling
- **Database:** MongoDB, MySQL
- **Tools/Platform:** Git, GitHub, Azure, Postman (API Testing), Vercel, Render
- **Architecture:** MVC Pattern
- **Soft Skills:** Problem-Solving Skills, Team Player, Project Management, Adaptability, Flexibility
- **CS Fundamentals:** Data Structures & Algorithms, OOP, DBMS, Operating Systems

## PROJECTS

- **Business Tax - Financial Accounting Software** | *React, Node.js, Express.js, MongoDB* February 2026
  - Built a comprehensive MERN stack financial dashboard to track corporate liquidity, managing multiple bank accounts and wallets with real-time balance updates.
  - Implemented automated PDF invoice generation with safe DOM-to-image rasterization and integrated Razorpay Payment Gateway for secure online transactions to streamline client billing workflows.
  - Developed secure RESTful APIs (Architected a modular backend using Express Routing to handle complex financial transactions and account management) to process complex internal fund transfers and aggregate diverse data streams into a unified transaction feed.
  - Implemented full CRUD operations for accounts, transactions, and invoices with optimized MongoDB schema design.
  - Optimized the frontend using reusable React components, custom modal state management, and responsive Tailwind CSS, architecting the application for scalable live cloud hosting.
- **Find My Career - Job Listing Platform** | *React, Node.js, Express.js, MongoDB* December 2025
  - Architected a full-stack job portal supporting dual-user roles (Recruiters/Seekers), implementing JWT for secure session management and role-based access control (RBAC)
  - Implemented secure authentication (JWT), user dashboards, and separate workflows for Job Seekers and Recruiters.
  - Developed job posting, application tracking, applicant management, and RESTful APIs with dynamic routing.
  - Implemented server-side pagination and filtering for job listings to improve performance and scalability.
  - Optimized for responsive UI, reusable React components, real-time notifications, and scalable MVC backend architecture.
  - Deployed frontend on Vercel and backend APIs on Render using MongoDB Atlas.
- **Edumax - AI Integrated E-learning Platform** | *React, Context API, Node.js, Express.js, MongoDB* April 2025
  - Designed and developed a responsive education platform using React and OpenAI API integration
  - Implemented user-friendly AI-powered chatbot and Question Generator.
  - Implemented authentication, dashboard functionality, and automated feedback generation.
  - Added server-side validation and centralized error handling middleware to ensure secure data processing.
  - Optimized API calls using Axios with asynchronous state management for improved user experience.

INTERNSHIPS

---

- React.js & MERN Stack Internship | Direct Axis Solutions

September 2025 – February 2026

  - Completed a 6-month intensive internship focused on building scalable web applications using React.js and the MERN stack (MongoDB, Express.js, React.js, Node.js).
  - Developed responsive and dynamic user interfaces using React.js with hooks, component-based architecture, and API integration.
  - Built and integrated secure REST APIs using Node.js, Express.js, and MongoDB for efficient data management.
  - Worked on live production projects, contributing to real-time features, bug fixes, and performance optimization in a collaborative development environment.
  - Tested and validated REST APIs using Postman to ensure reliability and data integrity.
  - Implemented security best practices including JWT validation and API rate limiting.
  - Followed industry best practices including Git version control, modular code structure, and deployment workflows for production-ready applications.
- Machine Learning and AI | IBM

July 2023

  - Acquired practical experience in designing, deploying, and optimizing machine learning models for various applications.
  - Handled and preprocessed large datasets exceeding 10,000 entries, enhancing model performance by 18 % through feature selection and tuning.
  - Implemented and evaluated supervised and unsupervised learning algorithms, attaining an accuracy of 87 % on validation datasets.
  - Leveraged Python libraries like NumPy, Scikit-learn, and TensorFlow to develop data-driven solutions and visualize key insights.

CERTIFICATES

---

- Fundamentals of MERN Stack Certification | Simplilearn

February 2026
- Artificial Intelligence Foundation for Employability | Infosys & ICT Academy

November 2024
- Artificial Intelligence | IBM

July 2023
- SQL for Data Science | Great Learning Academy

September 2022
- Data structures | Data Structures | UC San Diego (Coursera)

November 2019

ACHIEVEMENTS

---

- Solved 40+ algorithmic problems on LeetCode (Data Structures & Algorithms)

June 2023 – Present
- 4-star rating in C++ on Hacker Rank

Feb 2021 – Present
- Science boy of the year (SBOY):

June 2017-18

Secured 1st position in the competition which showcased scientific and technical knowledge

EDUCATION

---

- Lovely Professional University

Bachelor of Technology - Computer Science and Engineering; CGPA: 7.1

Punjab, India

August 2021 – April 2025
- EMEA HSS

Intermediate; Percentage: 95.48%

Kondotty, Kerala

April 2019 - March 2021
- GVHSS

Matriculation; Percentage: 98.00%

Kondotty, Kerala

April 2018 - March 2019
